DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Eugene Mar on November 9, 2004.

The application has been amended as follows:

In claim 1,

--line 3, after "together", --to form a protruded circuit board--has been added.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a light emitting diode device comprising a circuit module covered by a frame having an upper circuit and a lower circuit board forming a protruded circuit board wherein said upper circuit board is smaller than the lower circuit board, and a length of a side of said upper circuit board is different from a length of a side of said lower circuit board to thereby form an indentation, and wherein said upper circuit board is covered by said frame and a resin for secure assembly (claim 1). The remaining claims 2-13 are allowed by virtue of their dependencies on the independent claim. Hence, the examiner has allowed claims 1 through 13.

Art Unit: 2828

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ishinaga, Patent No. 5,938,312; Knaebel, Patent No. 4,152,624; Yajima et al., Patent No. 6,536,913; Izumi et al., Patent No. 5,274,570; Rashidi, GB 2164189; Ryu et al., Pub. No. 2004/0036819.

None of the above documents discloses the circuit module as recited.
